

SOMERSET COUNTY VEGETATION CONTROL

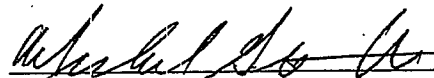

The Somerset County Road and Bridge Divisions will be performing ground applications of herbicides for vegetation control. These applications will take place along our County highway system within your municipality.

Both the State and Federal Governments approve all of the herbicides and spraying equipment we use to perform this task for ground application.

The areas that we intend to treat are those that are the most labor intensive for us to maintain. There are also safety sensitive areas along our highway system that need this type of application. Our ground applications will continue on a regular basis, as needed from April 1, 2009 through December 31, 2009. We shall post monthly notices in the local media for the duration of our application time frame.

SOMERSET COUNTY MOSQUITO CONTROL

Somerset County Mosquito Control will be performing ground and aerial applications for mosquito control over all of Somerset County. All of the insecticides and equipment used are approved for either ground and/or aerial applications by both the state and federal governments. Ground applications continue on a regular basis, while aerial applications will be conducted on an as needed basis. Somerset County Mosquito Control shall post notices on our website www.co.somerset.nj.us prior to each application.
